

Single Phase 100A Main Switch 6kA

Description

Single Phase 100A Main Switch 6kA

Construction and Features

- □ Capable of switch electric circuit with load
- Adaptable to padlock device
- □ Contact position indication
- □ Capable of quickly releasing stored energy operation
- ☐ Highlighted of high making and breaking capacity
- ☐ High short-circuit current withstand capacity
- ☐ Used as main switch for household and similar installation

Technical Data:

- □ Number of Pole: 1P
- □ Rated Current: 100A
- □ Rated working voltage: AC 230/400V
- □ Rated frequency: 50/60Hz
- □ Rated short-circuit making capacity: 6kA
- □ Rated withstand current: 2kA within 1 sec
- ☐ Electro-mechanical endurance: 10000 cycles
- □ Connection capacity: Rigid conductor 35mm²
- □ Connection terminal: Screw Terminal; Pillar terminal with clamp
- ☐ Installation: On symmetrical din rail 35mm; Panel Mounting
- □ Terminal Connection Height: H=19mm
